1. Software description

This custom program is divided into five parts:
Performance,DPI,Backlight,Assignment,PROFILE

1- Performance

Report rate:

125/250/500/1000 4 levels available.

The higher the value, the more frequently the mouse transmits data to the computer, which means that the mouse is more accurate

Double click

This function controls the interval between two clicks when forming a double-click instruction.

The higher the value, the faster you have to click to trigger the double-click command

Cursor speed

This will fine-tune the cursor speed on the DPI level.

The higher the value, the faster the mouse cursor moves

Mouse acceleration

Mouse accuracy enhancement mode, will prompt the accuracy of the mouse

2-DPI

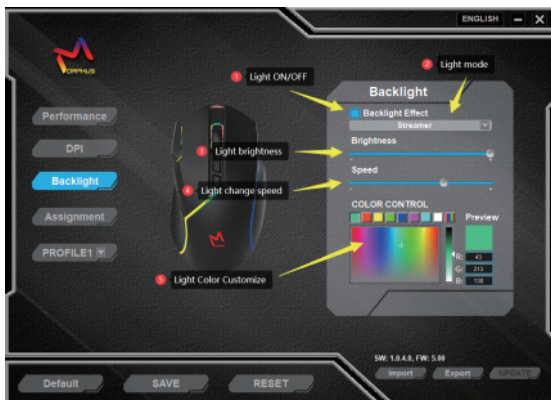

In this area, you can customize DPI ON/OFF, DPI light color and the DPI value of each level

3-Backlight

In backlight area, you customize light on/off, brightness, speed and color, there are six light modes you can choose.

4-Assignment
