Operation Guide

Start up

1. Make sure that the machine has sufficient power. Press and hold the power button on the top of the machine for 2 seconds to turn on the machine.
2. Press and hold the power button on the top of the machine for 2 seconds while the machine is on, the shutdown window will pop up and the machine will shut down.
3. Short press the power button of the remote control / machine, the machine will enter standby state.

Focusing

When the machine is turned on and the main control interface is displayed, if the picture is not clear, you can press the focusing + / focusing-on the top of the machine body to adjust the picture until the picture is clear.

Icon description

Boot into the home page as shown below

1 . **Web browser** 🖉
You can browse the network when connected to the Internet.

---

2 . **Display in same time connection** 🖥
Click to enter the display in same time screen connection interface: including Android wireless display in same time, Apple wireless display in same time, Apple wired display in same time. Select the display in same time mode for the display in same time connection according to the mobile phone operating system.

Android Wireless | iOS Wireless | CoolUSB Mirror

Connect with Android wireless display in same time
Connect the projector and the mobile phone to the same WIFI. The projector select the Android icon on the page to enter display in same time. Open the mobile phone "Settings" and find "Display". Select the projection screen and the mobile phone automatically searches for the device. When the mobile phone finds the device with the projection name AIKUN_AP200W, click "Connect" and the "display in same time" is set.
Note: The name of Android Miracast may not be consistent, and may be multi-screen, multi-screen interaction or wireless sharing, wireless display, projection screen, depending on the mobile phone. There are compatibility issues because the instrument version is different.
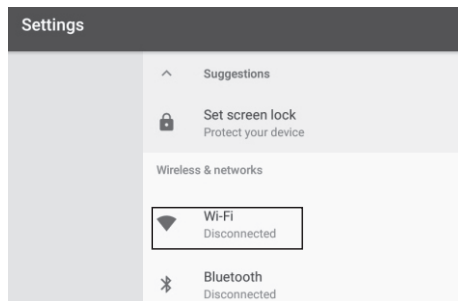

Connect with Apple wireless display in same time
Make sure the iPhone / iPad and the projector are connected to the same WIFI
Slide out AirPlay mirroring / screen mirroring from the bottom of the main interface of the iPhone / iPad, click on the projector device name in the device list: AIKUN_AP200W to connect with the projector.

Connect with Apple wired display in same time
Use iPhone / iPad data cable USB to connect AIKUN_AP200W and Apple device, wait for about 20 seconds after the connection is successful and the display in same time will be successful.

Note: if the machine restarts after stand-by, it should turn on the APP in the same screen to connect again.
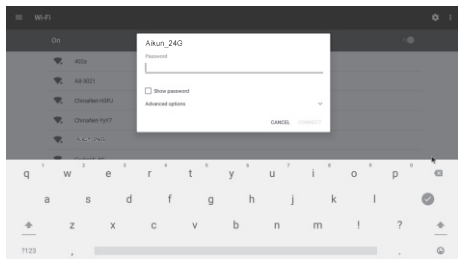

3 . **Video player** ▶
Click to enter the page of video playback.

4 . **Setting** ⚙
Click to enter the setting page.

WiFi connection settings
Click WiFi settings, select your WiFi signal, and confirm to pop up the password input interface.
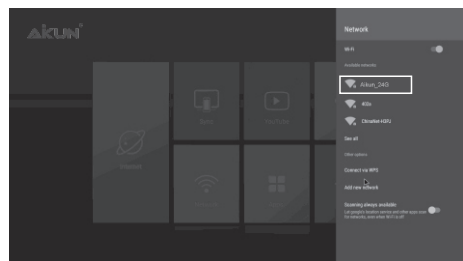

Enter your WiFi password and press the "Back" key, then select "Connect" to connect successfully.
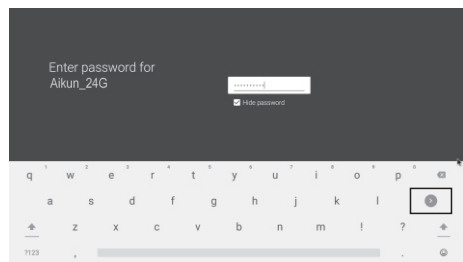

Bluetooth function introduction
Turn on the Bluetooth setting switch; search for the Bluetooth that needs to be paired, enter the password to pair and connect to Bluetooth.
Note: It supports various Bluetooth audio devices.

---

5 . **Quick setting for WiFi connection** 📶
Enter the page and select the WiFi signal to be connected.

Click "Connect" to show the keyboard. After entering the password, click "⊙" to connect to the network.

Select the connected network signal and press "OK" to view the IP parameters of the network.

6 . **Menu** ▦
Click to enter the page, this page contains all the installation programs of the machine.
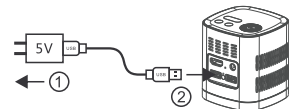

Android Mirror | CoolAirMirror | CoolUSBMirror | FileBrowser | Files
FOTA Update | Gallery | Media Center | MoviePlayer | Music
Settings | WebView

---

7 . **Brightness** ☀
Click to enter the brightness adjustment interface and press the left and right arrow keys to adjust the light machine brightness.

Brightness Control
— +

When this machine chooses to use HDMI, just plug in the HDMI cable to the device to be connected. It can be used for set-top boxes, personal computers, TV game instruments, etc.

CAUTION: Before running Restore Factory Settings and OTA Upgrade connect a 5V powersupply using a USB cable. Then connect the USB cable to the instrument.
